Define: (i) Coefficient of fluctuation of speed. (ii) Coefficient of fluctuation of energy.

Question:

Define:

(i) Coefficient of fluctuation of speed.

(ii) Coefficient of fluctuation of energy.

Answer:

(i) Coefficient of fluctuation of speed: Coefficient of fluctuation of speed is defined as the ratio of the maximum fluctuation of speed to the mean speed. It is denoted by C_s .

Mathematically,

$$C_s = (N_1 - N_2) / N$$

Where, N_1 = maximum speed in rpm;

N_2 = minimum speed in rpm; N = mean speed in rpm

(ii) Coefficient of fluctuation of energy: Coefficient of fluctuation of energy may be defined as the ratio of the maximum fluctuation of energy to the work done per cycle. It is denoted by C_e .

Mathematically,

$C_e = \text{Maximum fluctuation of energy} / \text{Work done per cycle}.$
